

BPMN 2.0 Editor – Installation Guide –

Marcel Michel

July 7, 2011

1 BPMN 2.0 Editor

1.1 Requirements

- Eclipse 3.6 (Helios) or newer
- Graphiti framework.
Update site: <http://download.eclipse.org/graphiti/updates/0.7.1/>
- Eclipse Modeling Framework

1.2 Installation

There are two possibilities to get the latest editor version:

1.2.1 Using update site

Use <http://codehoop.com/bpmn2> update site (Figure 1.1).

Note: The Feature project includes the bpmn2 metamodel, so select it if you have not currently installed the bpmn2 metamodel.

1.2.2 Using GIT

If you want to run the editor from source you also need to check out the source project of the bpmn2 metamodel at <http://git.eclipse.org/c/bpmn2/>.

Use [git://github.com/imeikas/BPMN2-Editor-for-Eclipse.git](https://github.com/imeikas/BPMN2-Editor-for-Eclipse) to get the source version of the editor.

1.2.3 Appendix
